WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

- Two holding pawls from 10 mm plate, one drive pawl from 8 mm
- 12.5 mm pivot hole; nose 2 mm radius; body 24 wide at the pivot
- Light torsion spring on each pivot pin keeps the nose on the teeth
- Washer and R-clip on each pin
- Check: each nose drops into every tooth gap

Pawls: making sketch

|                                                                    |             |                                                                                                     |                                             |                       |
